Welcome to Cumberland!

If you are new to our community or returning after many years, I am excited that you have decided to make this town your home. Cumberland has become one of the most desirable and safest communities to live in the state of Maine. It is a wonderful place to raise a family, enjoy the outdoors, and make lifelong connections.

As Town Manager, I oversee 60 full-time and 150 part-time employees. I feel fortunate to work alongside so many kind and dedicated individuals, many who grew up or reside in our community today. I hope you find your experiences with them to be enjoyable and helpful!

The Town has a \$14 million operating budget, which includes a capital budget that ranges from \$1 to \$1.5 million each year. Nearly \$7 million dollars of the operating budget is raised from non-property tax revenues.

Cumberland is governed by a seven-member, elected Town Council who meet the 2nd and 4th Monday of every month. The Council delegates responsibility in carrying out its mission to the Town Manager and town staff. Additionally, committees comprised of volunteer residents are tasked with research and oversight of specific town resources and activities. If you are interested in serving on one of these boards/committees, visit the Town Website to see the current openings.

I am honored to live and work in this community. If you have any questions, please do not hesitate to give me a call (207-829-4264) or send me an email at wshane@cumberlandmaine.com. I look forward to meeting you!

Development in Cumberland

290 Tuttle Road - (207) 829-2204

I bet you chose to move to this beautiful town because of its lovely pastoral views, quiet neighborhoods, great schools, ocean access and abundant open space. Like so many others who have made Cumberland home, you probably wonder if the town's many attributes will be lost as new residential and commercial development occurs.

I would like to share with you the ways in which Cumberland is trying to avoid the negative impacts of growth while still allowing property owners to make reasonable economic use of their properties.

- **Zoning** - The purpose is to geographically separate non-compatible uses. A typical pattern of zoning would often show a town center area with denser "mixed use" single and multifamily housing along with small-scale retail, restaurants, and professional office buildings. Expanding out from the center would be single-family residences on larger lots or farmland. Lastly, on the outskirts of town, would be industrial uses such as manufacturing facilities and earth extraction and processing plants.
- **Subdivision Ordinance** - For rules on dividing land into smaller lots
- **Site Plan Ordinance** - For review of non-residential development
- **Design Standards** - Strict guidelines for new development that will occur in the Town Center, the Route 1 Corridor and the Route 100 Corridor. These standards address architecture, site planning and landscaping, as well as other areas such as parking and lighting.
- **Comprehensive Plan** - This plan includes current demographic information and also states the goals and actions to achieve the desired changes in the community during the next planning period (usually 10 years). The plan usually takes 2+ years to create and 3-9 years to implement. Then the process starts all over again.

Once these various ordinances and plans are in place, it is the job of the Town's Planning Board to meet monthly to review proposed developments. To learn more about planning in Cumberland, I encourage you to visit the Town's website. On the website you will find links to the various ordinances listed in this overview as well as the comprehensive plan and past planning studies and resident surveys. The Town Planner, Carla Nixon, is available to answer any questions you may have. You can reach her by phone at 207-829-2204 or by email at cnixon@cumberlandmaine.com.
